

Comparative Physiology of the Brain and Comparative Psychology

This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1900 edition. Excerpt: ... CHAPTER II THE CENTRAL NERVOUS SYSTEM OF MEDUSAE. EXPERIMENTS ON SPONTANEITY AND COORDINATION

i. Experiments on Medusae or jelly-fish afford us an excellent opportunity for analysing the conditions for spontaneity and coordination, and for deciding whether or not these phenomena are dependent upon ganglion-cells. The subumbrella of the Medusae has a very thin layer of muscle-fibres which contract rhythmically. The contraction diminishes the size of the swimming-bell, and forces the water out. By means of the recoil the animal moves forward. In regard to the nervous system, we must discriminate between two classes of Medusae: first, the Hydromedusae (Hydroidea, Fig. 1), and, second, the Acalephae, one representative of which (*Aurelia aurita*, Fig. 2) is familiar to many laymen. The nervous system of the Hydromedusae consists of a double nerve-ring along the margin of the umbrella (d, Fig. 1). The upper nerve-ring forms a flat layer in the ectoderm, and consists of thin fibres and ganglion-cells. The lower nerve-ring has thicker fibres and more ganglion-cells, and is connected with the upper ring by nerve-fibres. In addition to this ring, which is called the central nervous system, there is also a peripheral nervous system, a plexus, consisting of nerves and scattered ganglion cells, spread out over the whole subumbrella (J>, Fig. 1), between the epithelium and the muscle-layer. The convex surface of the umbrella consists of a non-contractile, gelatinous mass, and no nervous elements are to be found in it. Acalephae (Fig. 2) have no continuous nerve-ring, but a row of separate nerve-centres (S, Fig. 2)

extends around the margin of the umbrella, lying in the ectoderm, which covers the basis of the marginal bodies (sense organs). The...
