

## Second Nights; People and Ideas of the Theatre Today

This book was published in 1914. PREFACE The first-nighter, as everybody knows, is a bored but witty person, with a black ribbon to his eye-glasses, who descends to his seat just before the curtain rises, and turns to survey the house ere he sits down. In New York, where theatres spring up overnight, he may be the large, red-necked man who supplied the concrete, but he is generally, at any rate, an insider, stirred by many things that pass the outsider by and inclined to be as concerned over the probable size of the audience on the third Tuesday as in the mere pleasure or nourishment to be had from the play. He is both spectator and participant, urging a new ship down the ways, and finds his interest divided perforce between the ship as a ship and the success of the launching. Author and players are waiting behind that closed curtain be the play never so unimportant, there is mystery and excitement in the air. The second-nighter breathes a duller ether. Gone is the mystery and contagious warmth, the first nights febrile unrest. The showman has opened his bag of tricks; the pack are off, baying after new game. There is no one in the audience. The man in front does not turn round to tell you how the author sat up all the night before rewriting his third act he is mere paper, or the brother of the property mans wife, or the sad-eyed sub-editor of a technical magazine, or an out-of-town buyer drifted in to The Lady from the Sea, thinking it a musical comedy. The play is better given than on the first night, but it stands on its own feet, is shorn of extraneous glamour. And the second-nighter himself, though he turn up as regular as the clock and magazine critics are likely to receive tickets for second nights is scarcely detached from the common herd. He is part of the public. The news and the spot-light have swung on ere he arrives. Nor is this without its compensations. If he misses the

gossip and excitement, he has a clearer view of the play. If a critic, he is almost too remote and leisurely to be worth the showman's time and is left a free agent, to come and go unnoticed in the crowd. The observations recorded here were made through several years of second nights a period from 1905 down to the present, of interesting and significant change in the English-speaking theatre in the intervals of other reporting. The second night sometimes became the second week or month, and a flood or a prize-fight, a revolution or a political convention, came in between. This, in itself, inclined one toward the general and human rather than severely technical aspect of the stage, and perhaps explains the fact that burlesquers and sombre poets, vaudevillians and fine-spun realists, are lumped together somewhat unceremoniously. The inclination was increased in my own case by the fact that in writing for Colliers where some of these comments originally appeared one was serving not only the man in the flat overhead and the mythical old lady in Oshkosh for whom all American magazines are edited, but so we fondly imagined pioneers in prairie boom-towns and soldiers in tropical isles. The theatre and its people are a side of life, like any other, and these chapters present certain impressions and opinions of it which, for one reason or another, shine out of that long and brightly lighted vista of theatre nights, that blur of audiences and of players, with a certain warmth and friendliness, like remembered faces seen in a crowd.
