

Animal Teachings: From Hayleys Angels Methods

My goal and my hope in writing this book is to open everyone's heart and mind to improve our world and better the lives of all living creatures, one at a time. We can all have a positive impact on someone else's life by bringing more joy, hope and healing than we ever thought possible. Together, we can learn to care not only for the physical body, but also for the mind and the soul. I hope this book helps anyone who works in a close relationship with people or animals, inspires medical students and veterinary students in becoming great doctors, guides the medical community and all health care professionals in bettering the care for all patients, animals and humans, as well as guides all patients in better caring for themselves. Why do we (animals and people) get sick? What are Animal Communication and Intuitive Medicine, and how much can they help you and your pet live better, with maximum health and happiness, as well as facilitate the transition into the Afterlife, with dignity and peace? Do we all, animals and humans, go to the same place? I want to share with you my journey, the teachings of animals on my path, and suggest to everyone to open up to all the divine teachings that both people and animals on your path are offering you. Together, we can heal our planet and build a better and happier world. It is time to rediscover our own power and use it selflessly in a global effort to help the world rise to a new level of energy and consciousness. I hope this book can show the way to a better world.
